Private practice:

1992-1994 Designer Braces, 71 Broadway, N.Y.,N.Y.

1994-Present

Private practice limited to orthodontics and dentofacial orthopedics. I treat all ages from children to adults and am a certified provider of Invisalign. I encourage early treatment and have been successful in treating skeletal malocclusions with removable orthodontia and orthopedic modification. With the use of new anchorage techniques I feel that most malocclusions can now be successfully treated without the need for tooth extraction. I offer standard braces as well as clear esthetic braces or lingual braces which are hidden behind the teeth. My mission is to provide outstanding and affordable orthodontic care to my patients.
